  Level: **Native**

PROFESSIONAL PROFILE

I'm a web developer specializing in Front end development with Angular, with a degree in Information and Communication Technologies Engineering (ICT) from Universidad Tecnológica del Sur del Estado de México (UTSEM). I have experience designing and developing functional, visually appealing web interfaces focused on user experience.

My professional experience includes internships completed as part of my degree program, as well as personal projects featured in my portfolio. These experiences have allowed me to apply my knowledge, strengthen my development practices, and continue learning independently.

I consider myself a responsible person with strong problem-solving skills, a self-driven learning approach, and the motivation to join a company where I can contribute value and continue growing professionally.
